## IPEI Donates Funds For ICSD Tech Initiative

---

The Ithaca City School District has received a significant gift from the Ithaca Public Education Initiative.

IPEI donated almost \$90,000 for the teaching and learning with technology 1:1 initiative.

School Board member Brad Grainger says with the money, the district will be able to start getting an iPad in every student's hands to move forward with new ways of learning.

Since the initiative was started with a pilot earlier in the year, Superintendent Dr. Luvelle Brown says teachers are reporting increased student engagement due to the reported shifts in instructional practices that are creative and interesting to a tech-savvy generation.
